مندلی در نوامبر ۲۰۰۷ در لندن تاسیس شده است. و نام آن از نام زیست شناس و شیمیدان معروف ، گرگور مندلی ، دیمتری مندلیف گرفته شده است .

مندلی مجموعه ای است که در زمینه جستجوی منابع ، همکاری های علمی و مدیریت منابع به محققان یاری می رساند مندلی نرم افزاری تحت وب و دسک تاپ است که برای اداره و به اشتراک گذاری مقاله های علمی و یافتن داده های پژوهشی و همکاری آنلاین مورد استفاده قرار می گیرد . مندلی در حقیقت یک شبکه اجتماعی برای پژوهشگران است .

نرم افزار قابل دانلود مندلی دسکتاپ می تواند برای استخراج خودکار جزئیات سند (نویسنده ، عنوان ، مجله و...) از نسخه های دیجیتالی مقالات علمی به پایگاه داده ها استفاده شود. وب سایت (مندلی وب) با ارائه تعدادی از ویژگی های مبتنی بر وب ، مکمل دسکتاپ مندلی است . در حقیقت کتابخانه ی آنلاین است که به ذخیره سازی و بازیابی اسناد از هر جایی از مرورگر کمک می کند .

مندلی به طور رایگان یک گیگا بایت فضا در اختیار کاربران قرار می دهد که البته این حجم با پرداخت هزینه قابل ارتقاء است . نسخه های مختلف دسک تاپ مندلی سازگار با ویندوز و مک لنوکس وجود

جدول زیر ویژگی های نرم افزار Mendeley را در مقایسه با سایر نرم افزار های مشابه نشان می دهد. لازم به ذکر است، اگر چه این نرم افزار امکاناتی دارد که در سایر نرم افزار های مشابه دیده نمی شود، اما هر یک از این نرم افزار ها امکانات منحصر به فردی دارند که آن ها را از سایرین متمایز می سازد

incidence has declined. In the United Kingdom, mass vaccination has also coincided with a sharp reduction in the geographical coherence of measles epidemics (4).

Mechanisms that sustain oscillations in the incidence of diseases such as measles are well known (1), but the causes of the transitions in patterns of epidemics are still poorly understood. **Models** that attempt to explain these transitions typically use the SEIR (Susceptible-Exposed-Infectious-Recovered) framework (5), using seasonal variation in transmission rate to mimic the aggregation of children in schools. Researchers using these **models** have emphasized endogenous dynamical explanations of transitions, based on chaos (3) or noise-driven shifts among coexisting stable cycles (6). These hypotheses suggest that it should be difficult or impossible to predict the timing and nature of specific transitions in measles dynamics. Here, we give an alternative explanation based on an

can be explained as bifurcations of a nonlinear dynamical system.

A very simple mathematical observation allows us to focus on a single parameter. For epidemic **models** that are not seasonally forced, it is an important standard result (8) that vaccination of a proportion p of the population effectively reduces the mean transmission rate $\langle \beta \rangle$ by a factor $1 - p$. This correspondence also holds for the full nonlinear dynamics of seasonally forced epidemic **models** (9). We predict, therefore, that vaccination at level p will induce epidemic patterns identical to those in an unvaccinated population with mean transmission rate $\langle \beta \rangle(1 - p)$. In addition, we predict that changes in the birth rate ν by a given factor should produce exactly the same dynamical transitions as changing $\langle \beta \rangle$ by the same factor (9).

Thus, in general, changes in the susceptible recruitment rate $\nu(1 - p)$ cause effective

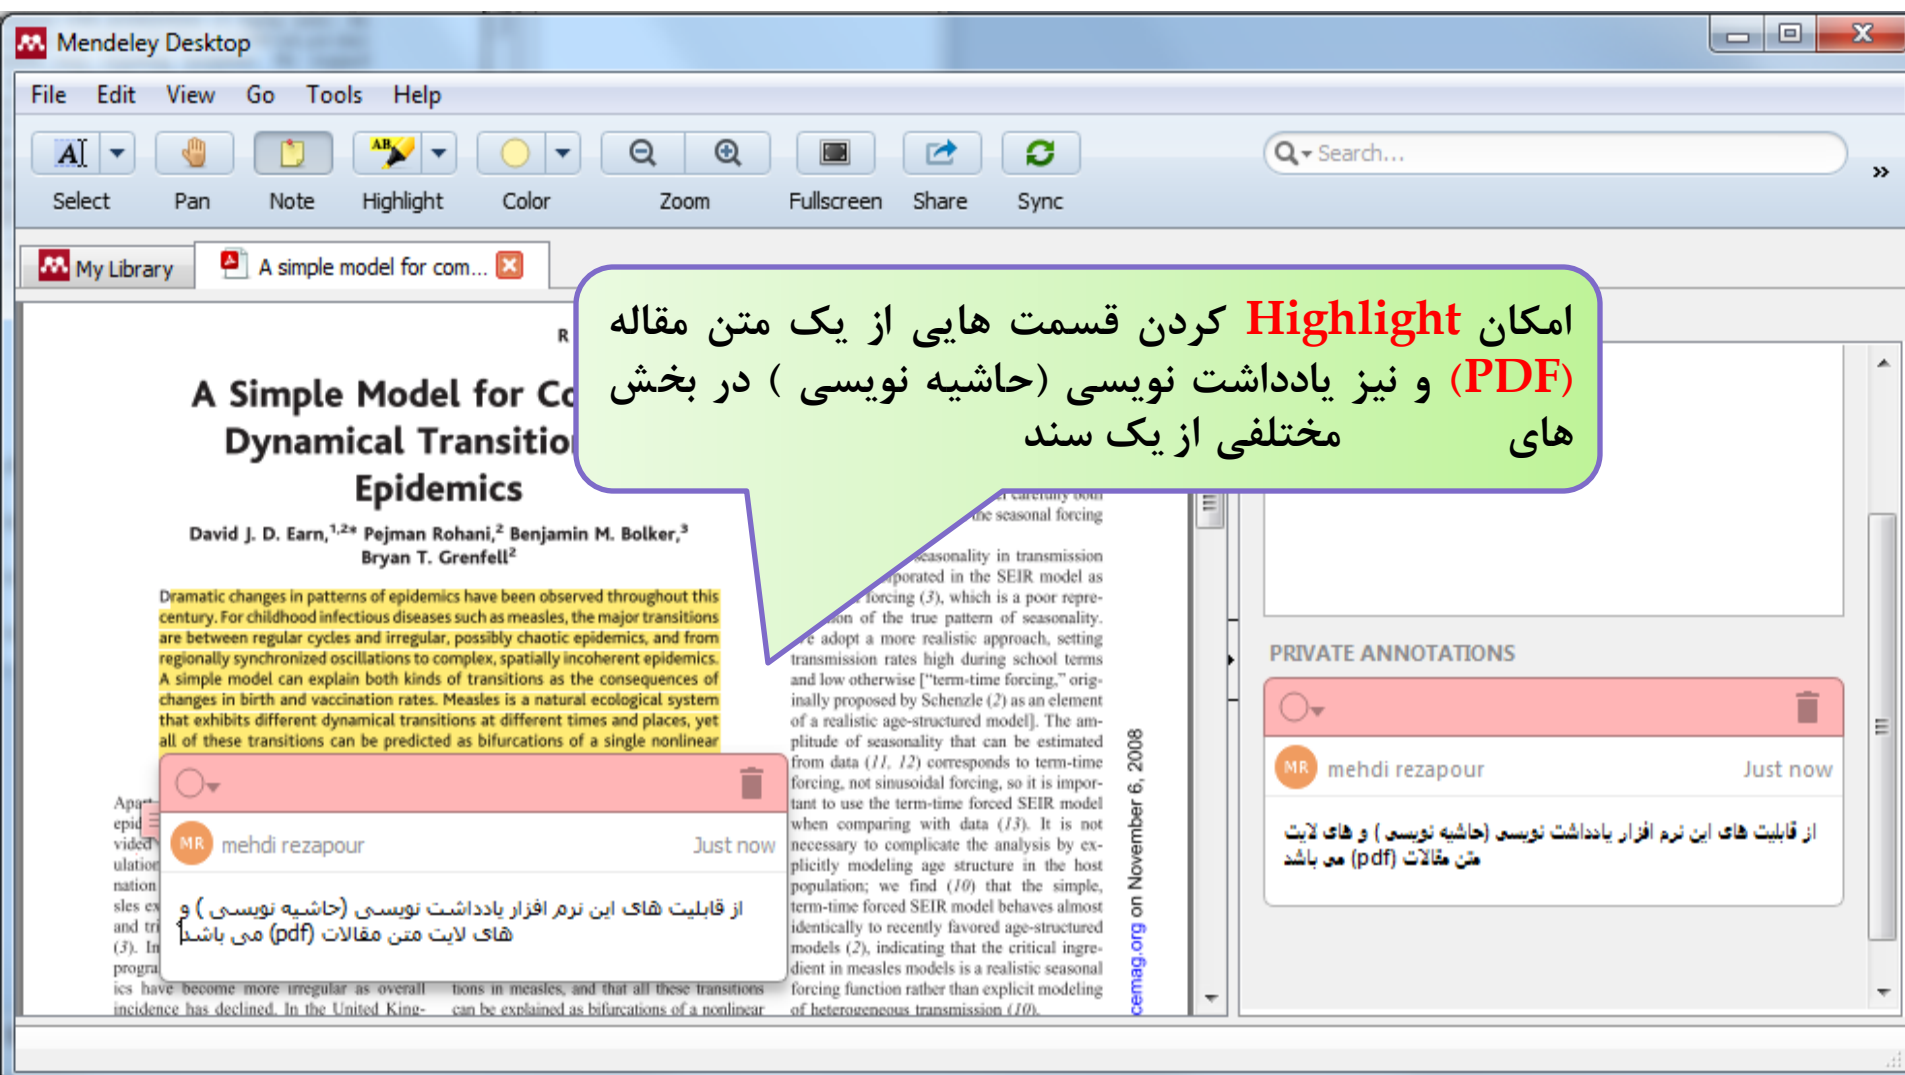

of heterogeneous transmission.

Figure 1 presents a bifurcation diagram for the term-time forced SEIR model for fixed parameters chosen to represent measles. The control parameter (the mean transmission rate $\langle \beta \rangle$) is the mean transmission rate. The ordinate shows measles incidence of each year, so annual incidence is represented by a single curve, but double curves, and so on. **Models** correspond to different stable states (basins of attraction).

For several values of the transmission rate $\langle \beta \rangle$, basins of attraction are shown in the bifurcation diagram in Fig. 1. When solutions coexist, stochastic dynamics due to the complicated dynamics of the system show that the basins of attraction

Use the **highlight** and **note** tools to create annotations.

A human **colon cancer** cell capable of initiating tumour growth in immunodeficient mice
CA O'Brien, A Pollett, S Gallinger, JE Dick - Nature, 2007 - nature.com
Abstract **Colon cancer** is one of the best-understood neoplasms from a genetic perspective 1, 2, 3, yet it remains the second most common cause of **cancer**-related death, indicating that some of its **cancer** cells are not eradicated by current therapies 4, 5. What has yet to be Cited by 3477 Related articles All 16 versions Import into BibTeX Save More

Identification and expansion of human **colon-cancer**-initiating cells
L Ricci-Vitiani, DG Lombardi, E Pilozzi, M Biffoni... - Nature, 2007 - nature.com
Abstract **Colon** carcinoma is the second most common cause of death from **cancer** 1. The isolation and characterization of tumorigenic **colon cancer** cells may help to devise novel diagnostic and therapeutic procedures. Although there is increasing evidence that a rare Cited by 3343 Related articles All 19 versions Import into BibTeX Save More

Activation of β -catenin-Tcf signaling in **colon cancer** by mutations in β -catenin or APC
PJ Morin, AB Sparks, V Korinek, N Barker... - ..., 1997 - science.sciencemag.org
Abstract Inactivation of the adenomatous polyposis coli (APC) tumor suppressor gene initiates colorectal neoplasia. One of the biochemical activities associated with the APC protein is down-regulation of transcriptional activation mediated by β -catenin and T cell Cited by 3679 Related articles All 16 versions Import into BibTeX Save More

Laparoscopic surgery versus open surgery for **colon cancer**: short-term outcomes of a randomised trial
Colon Cancer Laparoscopic or Open Resection ... - The lancet oncology, 2005 - Elsevier
BACKGROUND: The safety and short-term benefits of laparoscopic colectomy for **cancer** remain debatable. The multicentre COLOR (**Colon cancer** Laparoscopic or Open Resection) trial was done to assess the safety and benefit of laparoscopic resection compared with Cited by 1625 Related articles All 15 versions Import into BibTeX Save More

▲ Abstract 1 of 1

Vitamins, minerals, and phytochemicals

Higher dietary flavonoid intakes are associated with lower objectively measured body composition in women: evidence from discordant monozygotic twins^{1,2}

Background: Although dietary flavonoid intake has been associated with less weight gain, there are limited data on its impact on fat mass, and to our knowledge, the contribution of genetic factors to this relation has not previously been assessed.

Mendeley Brainstorm: Ageing Societies – Getting Wiser?

The elderly is one of the fastest growing segments of the world's population. For example, the number of people in Japan aged over 65 hit a record high in 2016. What changes will we see in technology and society as a result? How do we get wiser about getting older? We are looking for the [...]
